

Exeter, Ontario - Latec Instruments Inc. introduces a new single slope laser system

The Latec *LT-810* is an affordable, automatic true self-leveling single slope laser. It is rugged, reliable, and accurate. It is designed for any level or sloped application; grading and excavating, concrete floors and footers, parking garages and ramps, site preparation and dirt grade, etc.

"The *LT-810* is Latec's latest product addition; it is aimed at a special niche market and offers durability, accuracy and it is cost-effective", said Mike Hunter, Engineering Manager for Latec Instruments. "Our goal was to deliver a single slope laser that offers maximum performance at a very affordable price".

"Our senior management has worked very hard to identify a laser opportunity; and our engineering team has responded with a superior single slope laser that will help operators get the job done faster; increasing efficiency and profits", said Paul Marsh, General Manager for Latec Instruments.

#### *LT-810* Features Include:

- ✓ Automatic self-leveling in level & slope mode
- ✓ Height of instrument alert (HI alert)
- ✓ Long 2,000 foot operating diameter
- ✓ Machine control compatible
- ✓ 635nm visible red beam

About Latec Instruments Inc.

Latec is an Electronic Design and Manufacturing Company, specializing in laser and inclinometer machine control systems. We focus on various market segments including Agriculture, Construction, Surveying and Recreation. As a specialty niche manufacturer we also seek out customers that have a unique need whereby laser and/or a machine control may solve a problem or provide a solution.
